

#### **SETTING UP**

Big angle setting up with dual cylinders and sliding racks for a fast and reliable stand of beam for a rough work of unit.

#### **POWER STATION**

Engine efficiently delivers tremendous power to all drilling functions so you can get the job done faster.

#### **ROTARY & CARRIAGE**

Exceptionally efficient hydrostatic pumps control rotation and thrust design enhancements include a larger displacement pump and simplified two-speed hydraulic thrust circuit for increased reliability.

#### **OPERATING STATION**

The operating elements are clearly arranged and all functions and drilling parameters can be controlled without a problem via interactive control.
